ences as hospital corps worker in Belgium.

To-morrow he will give the readers of The Tribune a glimpse at the contents of the diaries of numerous officers and soldiers of the German army which devastated Northern France. The French General Staff has made a collection of these diaries, taken from prisoners and from dead bodies. They are preserved as irrefutable testimony out of the mouths of the invaders themselves to the "frightfulness" of Germany's campaign of terrerism in occupied French territory.

Mr. Gleason has seen these diaries and has extracted from them an indictment similar to that which his own experiences in Belgium had led him to draw against the calculating ferocity of German military policy. "Dead men tell no tales," says the old proverb. But the dead men represented in this collection of diaries have told tales which will live forever to challenge Germany's claim to recognition among the nations whose practice has honorably accorded with their professions as exemplars of humanity and civilization.
